NOTICE OF CONSTRUCTION ACTIVITIES
Utility Right of Way

Re: Water Main Work along PSEG Utility Right of Way

Please be advised that Ridgewood Water (RW) has contracted with ConQuest Construction, Inc. to rehabilitate the existing 20" diameter water main that runs along or adjacent to the commonly known PSEG Utility Right of Way from East Glen Avenue (between George Street and Van Buren Street) to just south of N. Irving Street by Stevens Field. The water main and associated planned work locations are shown in red on the attached map. The water main work is part of Ridgewood Water's long term replacement and rehabilitation program, with the intent to sustain reliability and improve water quality and flow.

Preliminary Construction activities have begun with much of the work commencing as early as March 6 and is currently anticipated to be completed around early May. Completion of this work will take place between 7 am and 5 pm, Monday through Friday. During this timeframe, traffic flow may be impacted at certain locations, with detour routes planned to divert traffic around the construction areas. Construction activities may require road closures; however, immediate local traffic will be provided access.

The contractor is responsible for restoring any pavement, driveways, sidewalk, lawn areas and other features damaged during the work which will not take place until the entire project is completed.

Please feel free to contact Jill Fasano, Sr. Engineer at RW, if you have any questions or concerns regarding this project. Jill can be reached at 201-670-5500 ext. 2282 or via email at jfasano@ridgewoodnj.net. In the event of an emergency due to construction you may contact Frank Putrino of Conquest directly at 201-538-1647. Your patience and understanding during this process is greatly appreciated and we apologize for any inconvenience to you.

Sincerely,

The Ridgewood Water Team

Cc: Heather Mailander (Village Manager), Christopher Rutishauser (Village Engineer)
