

Ridgewood Water Weekly

Road Work Ahead

Week of 6/19/23

No Expected Traffic Interruptions: RW is focusing on hydrant inspections and Main to Curb Replacements on small side streets, thus we don't expect any major traffic interruptions this upcoming week.

Maintenance and Repairs

Hydrant Inspections: RW is in the second week of our 2023 Hydrant Inspection Program. The crews will be finishing up Wyckoff, are working in Midland Park, and will be moving on to Ridgewood and Glen Rock in the next two weeks. Visit our Website and see our [2023 Hydrant Inspection Map](#) under the latest news.

Lead Service Lines: RW crews will be working on Main to Curb Replacements throughout the week. We will also have crew members performing Hydro Excavation Inspections as well as in-home inspections to identify any service lines of unknown material.

Capital Improvements

Ravine PFAS Treatment Facility: RW is beginning demolition at the Ravine Treatment Facility, leading up to the groundbreaking of the 3rd PFAS Treatment Facility.

Prospect PFAS Treatment Facility: The Village of Ridgewood has awarded the construction contract for the Prospect PFAS Treatment Facility. An exciting step in the 4th PFAS Treatment Facility's construction timeline

Important Messaging

Water Conservation: Ridgewood Water remains in Stage 2 Water Irrigation Restrictions. As RW works to install the PFAS Treatment Facilities, our operational strategy is to pull water from wells with the lowest levels of PFAS contamination. Customers can help by continuing to conserve water. When you conserve, RW can meet your demand for water by relying on the wells that have the lowest PFAS levels

Ridgewood Water Weekly

Road Work Ahead

Week of 6/26/23

No Expected Traffic Interruptions: RW is focusing on hydrant inspections and Main to Curb Lead Service Lines Replacements on smaller side streets, thus we don't expect any major traffic interruptions this upcoming week.

Maintenance and Repairs

Hydrant Inspections: RW is in the third and final week, barring any weather delays, of our 2023 Hydrant Inspection Program. The crews will be finishing up Midland Park and are progressing into Ridgewood and Glen Rock throughout the week. See our [2023 Hydrant Inspection Map](#) for information on current locations and progress.

Lead Service Lines: RW crews will be working on Main to Curb Lead Service Line Replacements throughout the week.

Capital Improvements

Ravine PFAS Treatment Facility: RW is beginning demolition at the Ravine Treatment Facility, leading up to the groundbreaking of the 3rd PFAS Treatment Facility. This facility will be located on the border of Ridgewood and Wyckoff.

Prospect PFAS Treatment Facility: The Village of Ridgewood has awarded the construction contract for the Prospect PFAS Treatment Facility. An exciting step in the 4th PFAS Treatment Facility's construction timeline. This Facility is located in Glen Rock.

Important Messaging

Water Conservation: Ridgewood Water remains in Stage 2 Water Irrigation Restrictions. As RW works to install the PFAS Treatment Facilities, our operational strategy is to pull water from wells with the lowest levels of PFAS contamination. Customers can help by continuing to conserve water. When you conserve, RW can meet your demand for water by relying on the wells that have the lowest PFAS levels
