

Ridgewood Water Weekly

Week of 3/18/2024

Road Work Ahead

Potential for Traffic Diversion: (Moderate)

RW Capital Improvement Contractors will be working in Wyckoff. RW has an active water main replacement project on Carlton Road and Hartung Drive.

Capital Improvements

Ames PFAS Treatment Facility: Last week, the Village of Ridgewood Council awarded the construction contract for the Ames PFAS Treatment Facility to Coppola Services. Construction is planned to commence in Summer 2024, pending the final review by the NJ I-Bank. This marks another important milestone for our PFAS Master Plan as this will be the 2nd facility in the Big 4 Group to be awarded. At this point 5 of the 12 planned facilities are moving into or have completed the construction phase.

Satellite Wells Raw Water Mains-Contract 2: Last week, the Village of Ridgewood Council also awarded the second construction contract for the installation of Raw Water Mains to Underground Utilities. The purpose of this project is to connect satellite wells to the new/proposed PFAS Treatment Facilities. Pending the final review by the NJ I-Bank, construction is planned to commence in April 2024 and be completed by July 2024.

Important Reminders

Ridgewood Water Lead Service Line (LSL) Replacement Program Letters: Ridgewood Water recently sent letters with introductory information to all customers who may have a lead service line. Those who did not receive letters over the past two weeks do not have lead service lines, according to our records. If you did not receive a letter and would like to confirm your service line material, please use our [service line lookup tool](#).

Let's Be Water Wise: Warm weather is coming, and our yards and gardens are greening up. Did you know that water use triples in the summer due to lawn watering? We need your help to cut back on outdoor water use by 20%. Be water wise as you set your irrigation system or get out your hose and sprinkler. Across the state, communities are questioning the old irrigation schedule. Let's show New Jersey how Glen Rock, Midland Park, Ridgewood, and Wyckoff, once again, lead the way by following the two-day watering schedule.
