MAIN STREET, GLEN ROCK
March 2026

Re: MAIN PFAS Treatment Facility Construction

Ridgewood Water is conducting a Capital Improvement Project in your area.

Please be advised that Ridgewood Water (RW) has contracted with Sovereign Consulting, Inc. to construct a new PFAS Treatment Facility on the grounds of our current water utility facilities at the end of DeBoer Drive just west of Main Street in Glen Rock. This project is part of Ridgewood Water's commitment to investing into the future sustainability of our water system and executing the PFAS Treatment Master Plan.

Construction began in February 2026 and are planned to continue through October 2026. Most site access is via the existing driveway at the end of DeBoer Drive, but Sovereign will need to access the site from Main Street on a few occasions because the driveway access cannot accommodate certain activities, and direct access from the Rte. 208 ramp is not feasible.

When Main Street access is used, the contractor will stay clear of the sports fields and Community Garden and will fence off their vehicle path to avoid conflicts with pedestrians. In addition, Glen Rock police will be notified to assist with traffic control while the trucks are working.

Please feel free to contact Ridgewood Water if you have any questions or concerns. Customer Service can be reached at 201-670-5520, or by email at cswater@ridgewoodnj.net. Your patience and understanding during this process is greatly appreciated and we apologize for any inconvenience to you.

Sincerely,

Ridgewood Water
Sovereign Consulting, Inc.
