

Lead Service Line Replacement Program

Ridgewood Water's contractor has replaced the lead service lines for the 500 properties who opted-in to the program for the 2025-2026 Contract 1.

Restoration is underway for any lawn/sprinkler, sidewalk/driveway/curb repairs due to the pipe replacement work. Restoration crews have been working their way through the towns, and inspectors will follow up in several weeks to assure proper growth for the lawn surfaces.

Next, asphalt restoration will be completed where required in the street portion of the work.

Later this summer, the next Phase (Contract 2) will be bid for the next 500 property owners that Opt-in.
