Glen Avenue Water Main Project Coming Up

As part of Ridgewood Water's ongoing commitment to providing high-quality drinking water and maintaining reliable infrastructure, we will soon begin a major water main improvement project along Glen Avenue, from Highwood Avenue in Midland Park to Oak Street in Ridgewood.

The project will include replacing and upsizing aging water mains, as well as replacing water service connections, all within the public right-of-way. Homes within the construction area will be connected to a temporary above-ground water system while work is underway. Montana Construction, Inc., the project contractor, will notify affected homeowners in advance before their water service is transferred to the temporary system.

Construction is scheduled to begin on or about **Monday, September 21, 2026**, starting in Midland Park, and is expected to be completed in four to six months. Work will take place on weekdays between **7:00 am and 6:00 pm**.

Traffic delays, detours and periodic road closures are expected. **Please plan ahead, allow extra travel time and use alternate routes when possible.** Residents who live within the active construction area will continue to have access to their homes, and streets will reopen at the end of each workday.

Once the new water mains are installed, Montana will contact individual homeowners before replacing the Ridgewood Water-owned portion of the water service line serving their property. The contractor also will restore driveways, sidewalks, lawn areas and other features disturbed by the construction. Final roadway paving is expected to take place in spring or summer 2027.

We recognize that a project of this size will cause temporary inconvenience, and we appreciate your patience and cooperation while these important improvements are completed.

Please contact Ridgewood Water at **201-670-5520** if you have questions or need additional information.

Ridgewood Water Offices Closed on Labor Day

In observance of Labor Day, Ridgewood Water offices will be **closed on Monday, September 7**. Please note that our water system operators are on duty 24 hours a day, seven days a week and remain available for water-related emergencies. If you experience a water emergency, please call 201-670-5520, extension 8.
